

Store View Flags

Dss

To install Magento 2 StoreviewFlags extension:

Step 1: Unzip the file.

Step 2:

Create a new directory: app/code/Dss/StoreviewFlags. StoreviewFlags is the module's internal identifier which can be found in the "composer.json" file of the downloaded compressed file. (Please see node "psr-4").

Step 3:

Upload to root file of your Magento installation to have this directory rootfile/app/code/Dss/StoreviewFlags. The Magento root directory contains directories such as "app", "bin", "lib" and more. All directories should match the existing directory structure.

Step 4:

Go to Magento 2 root directory. Enter command line:

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy
```

```
php bin/magento cache:flush
```

How It work?

Overview:

Magento 2 Store view Flags extension helps to increase the visibility of the whole website by adding nice flats next to store view's names or replacing these names with flags only. This makes customers easily recognize where to switch stores as well as improve convenience your multilingual websites.

How Does It Work?

You go to **Store ⇒ Configuration ⇒ Dss ⇒ Storeview Flags** to start making configuration.

Storeview Flags

Enable
[store view] Yes

Version 0.0.1

Hide Storeview Names

Enable
[store view] No
